Software Engineer with a robust foundation in frontend architecture and commercial experience building scalable applications with Next.js. My background includes engineering complex, fully-typed UI libraries and flexible theming systems in the React ecosystem. Having recently completed advanced training in Node.js and API design, I am expanding my technical scope across the entire application stack, including both NoSQL (MongoDB) and SQL databases (PostgreSQL). I am highly motivated to deliver end-to-end solutions and am actively exploring the integration of artificial intelligence. I am highly adaptable and eager to tackle complex technical challenges in full-stack capacities within a collaborative team.

Work experience

Frontend Engineer

EPAM Systems, Inc.

Jan 2024 - 2026

Security Orchestration Platform (EPM-SOP)

- Developed the frontend for an IT security orchestration platform focused on enterprise threat response using Next.js and TypeScript.
- Implemented complex architectural approaches and utilized custom UI components to streamline critical security workflows.
- Created comprehensive unit tests for React components, achieving 60% test coverage across the application, and resolved SonarQube vulnerabilities to ensure code security, flexibility, and high-quality standards.
- Stack: ReactJS, Next.js, TypeScript, CSS Modules, Jira.

Frontend Engineer

EPAM Systems, Inc.

2022 - 2024

Unified UI Library (EPM-UI)

- Engineered new, reusable, and highly performance-optimized React components for the internal open-source UUI library.
- Architected a theming system allowing dynamic styling of React components.
- Conducted refactoring and optimization of legacy components to improve maintainability.
- Wrote comprehensive tests for components and managed documentation pages.
- Stack: TypeScript, ReactJS, CSS Modules.

Jun 2021 – Oct 2021

- Facilitated the migration of the legacy PHP platform to a modern stack (PHP8, Laravel, ReactJS).
 - Developed frontend interfaces for a global logistics marketplace enabling online cargo booking.
 - Stack: ReactJS, Redux, TypeScript, Docker, Jira.
-

Education

- Bachelor's Degree | Odessa Military Institute (1993 – 1997).

Courses and certificates

- Advanced Node.js Course (GO IT) | Completed March 2026 Focus: CRUD in Express, MongoDB and Mongoose, RESTful APIs, Authentication, Image Processing, Deployment to Render.com.
- Front-End Development Courses (JS, React JS) | 2017 – 2020
Institutions: Beetroot Academy, Lviv IT School (Prometheus).

“Choose a job you love, and you will never have to work a day in your life.”
